

Mobile App v3.0.7 (Android and iOS)

Web v3.1.2

Release Announcement

LIVE Access mobile apps v3.0.7 have been released on the Google Play Store and the Apple App Store, with two primary improvements:

- QR codes can now be scanned to unlock LIVE Locks using Zebra and Honeywell's embedded barcode scanners, for faster use with mobile devices so equipped.
- iOS features now match those of the Android app, except for InVue device firmware updates. Both iOS and Android apps have been upgraded to improve compatibility* as shown:

Feature Support	Android	iOS	Zebra Devices	Honeywell Devices
Camera	✓	✓	✓	✓
NFC	✓	✓	✓	✓
Bar Code Scanner	N/A	N/A	✓	✓
Bluetooth	✓	✓	✓	✓
InVue Device Enrollment	✓	✓	✓	✓
InVue Device Firmware Update	✓	✗	✗	✓

There are also minor fixes and performance improvements. The LIVE Access web portal has been updated to v3.1.2 to align with the new mobile app.

Thank you for your use and support of LIVE Access. We look forward to your feedback!

* Compatibility is expected across most common devices and operating systems using Android and iOS. Releases are tested on a range of devices and operating systems including: Samsung Galaxy XCover Pro, Galaxy S10e, Google Pixel 7, Moto Razor 40 Ultra, Apple iPhone XS, iPhone X, iPhone 8 Plus, Zebra TC58, Honeywell CT40XP, Android v13, v12, v9, iOS v17.0.3, v16.7.2. Please contact InVue regarding specific device compatibility or testing requirements.
