Low Surface Energy Polish Kit

Manual:

- 1 Open the polish packet.

- 2 Squeeze a small amount of polishing compound to the back of the device.

- 3 Use the microfiber cloth to rub the polishing compound onto the device

- 4 Use the microfiber to buff the back of the device.

- 5 The device is now ready to have an LSE plate or other adhesive applied to the surface.

Note: Repeat the process for any additional devices.
