

Device enrollment using OneKEY app

Instructions:

Once you log into app press on Hamburger menu on top left side

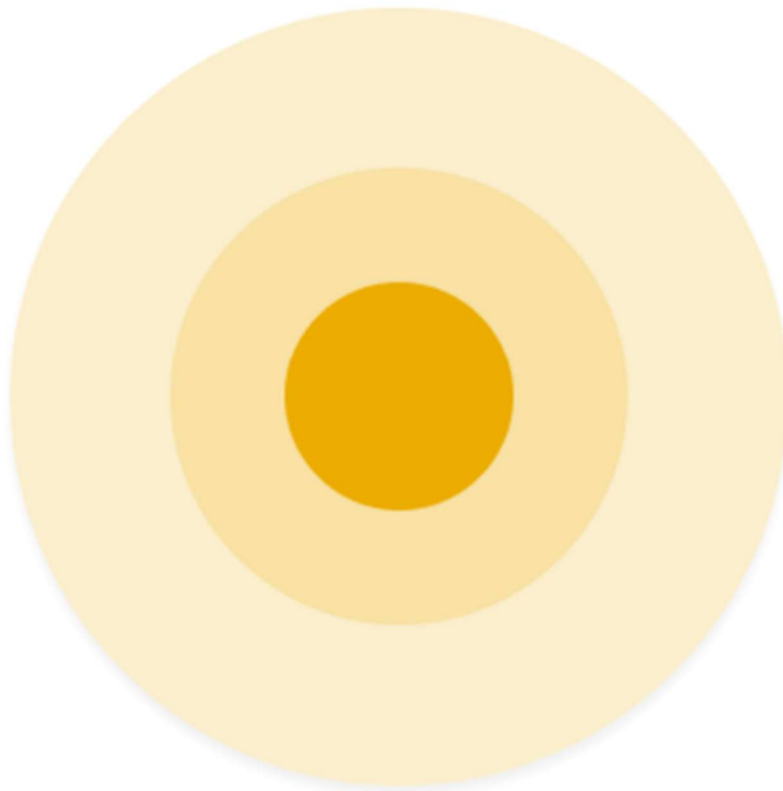

1. Select Get Info

Connect for details

Touch anywhere below to check properties and status for a specific device.

2. Press on yellow/orange circle

Tap to get details

Hold your mobile device against the lock.

3. Hold your mobile NFC against top side of the Live Lock (circular part with texture)

4. Once device is recognized you should see Serial number and setup button on bottom right side

5. Press Set up + button

The screenshot shows the 'Set up device' screen in the InVue mobile application. At the top is a dark navigation bar with a hamburger menu icon on the left, the 'InVue' logo in the center, and a user profile icon on the right. Below the navigation bar, the title 'Set up device' is displayed in a large, bold font. A paragraph of text explains that the user can change the device's name and assign it to groups, or do it later through the 'Devices' section or the web portal. Below this text, there are three input fields: 'Device name' with the value 'New device 0000051A000007C1', 'Serial Number' with the value '0000051A000007C1', and 'Location' with the value 'DEMO_Temp'.

Set up device

You can change the device's name and assign it to groups. If you choose not to assign groups now, you can do it later through Devices or the web portal.

Device name

New device 0000051A000007C1

Serial Number

0000051A000007C1

Location

DEMO_Temp

6. You can leave information as is and press Save button after that following screens should pop up

inVue

Setting up lock...

Keep this screen open until the device is finished setting up.

New device 0000051A000007C1

Registering...

inVue

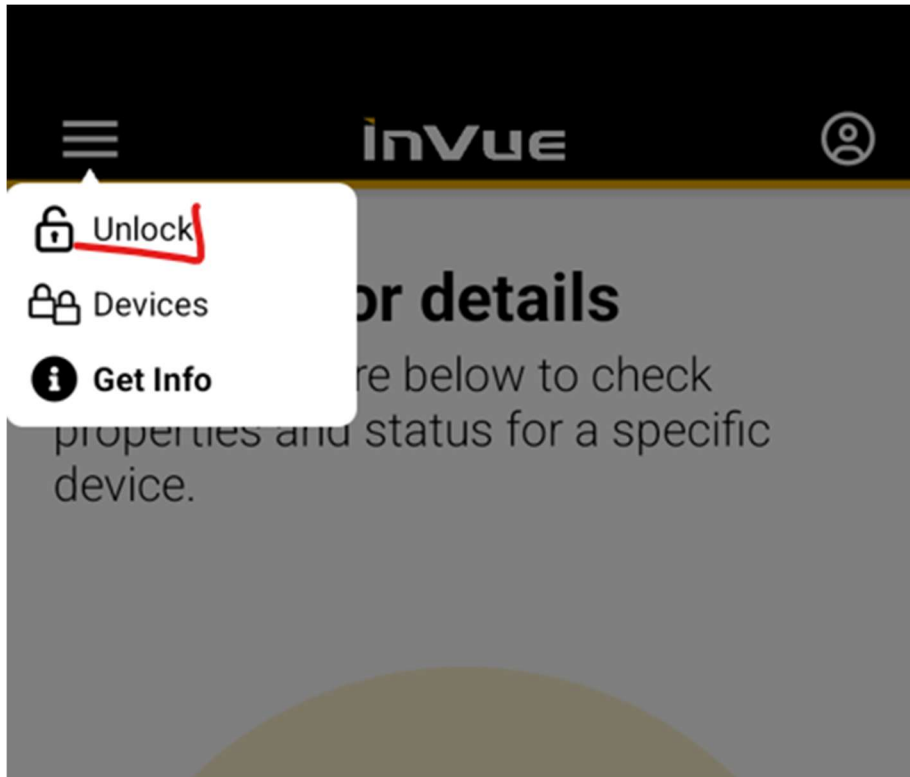

Setup complete

New device 0000051A000007C1

7. Once completed press hamburger menu again and select Unlock

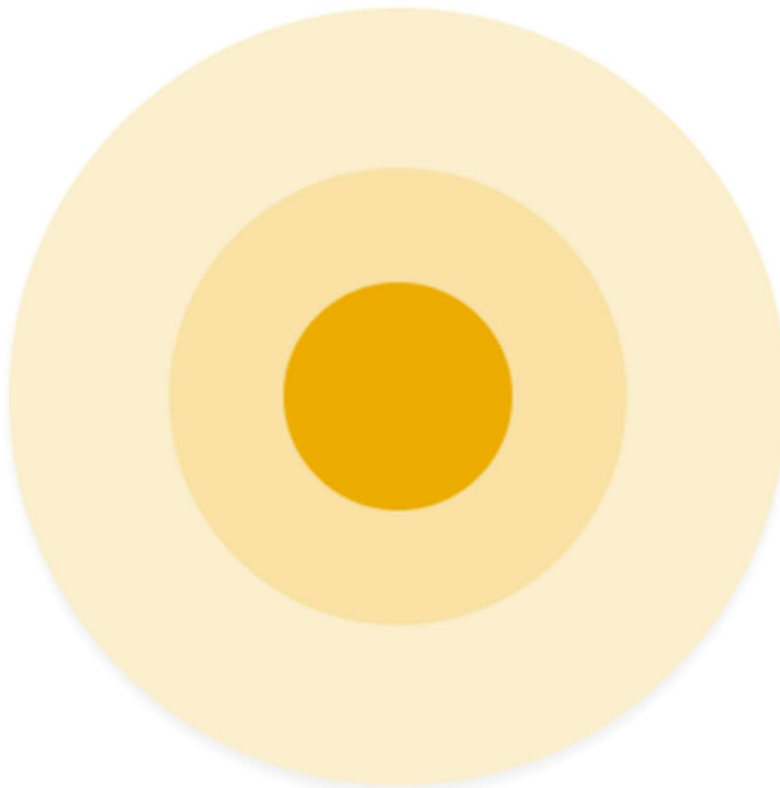

8. App will get into unlock mode
